

## **JDE Functional Analyst**

This position will be responsible for the design, development, upgrade, maintenance, and production support, both technical and functional, of the Oracle/JD Edwards EnterpriseOne ERP and all related interfaces and systems. The position will work within the IT Applications team and with the JD Edwards internal users to foster innovation, provide business automation expertise, and recommend cost-effective technology solutions for the enterprise business partners. The ERP Applications Analyst will provide functional support, design and develop new and modified functionality, reports, forms, and interface systems in support of Finance/Accounting, Tax, Inventory Management, Customer Service and other corporate departments. The position will also support corporate application improvement/development projects to ensure successful fulfillment of end-user requirements, accurate testing, training development, and quality implementations.

### **Essential Job Duties**

Partner with business units to understand requirements and create product designs/solutions that meet or exceed their needs.

- Define software and reporting solutions which offer innovative design to enhance the overall business process
- Effectively develop and document detailed functional specifications that bridge business requirements and system functionality
- Develop system process flows, logical and physical designs, use cases, and diagrams to translate user requirements into software development or package configurations
- Configure JD Edwards modules according to business requirements
- Develop test plans and scripts to ensure turnkey solutions to customers; perform testing of systems, applications and/or system interfaces
- Create application supporting documents including security requirements, user manuals, training material, etc.
- Effectively design and implement tools that will be used across the organization
- Ensure Service Level Agreements for supported applications are met or exceeded
- Provide production support for the JDE application and related systems and interfaces
- Provide application support for the end users assisting them in effectively using the system and handling system related inquiries

### **Required Skills, Education & Experience**

- 4+ years functional experience implementing and supporting JD Edwards EnterpriseOne 9.1+ including the following modules/areas:
  - Manufacturing
  - Manufacturing Accounting
  - Grower and Blend
  - Distribution
  - Experience with Financials and Pricing strongly preferred
- Excellent problem solving, analytical, and reporting skills
- Ability to meet deadlines in a fast paced environment
- High level of professionalism, integrity and commitment to quality
- Excellent communication skills – verbal, written and listening
- Team player, willing to take on all tasks, large & small
- Bachelor's Degree in Computer Science, Management Information Systems, Business, or equivalent work experience
- MBA or other advanced degree a plus
